Managed Office

The full package: Ops Atlas™, device care, network, identity, and support handled as one service at a predictable monthly cost, with full environment monitoring and license management included.

Microsoft 365 Administration

Mailbox and license management, security and compliance settings, SharePoint and Teams governance, and user provisioning. Choose individual services or have us administer the tenant.

CUSTOM PROJECTS

Third-Party Software Integration | **Single Sign-On for External Apps** | **Badged Access** | **Custom Staff Training**

We plan it, set it up, and train your team on it.

We help facilitate the implementation and documentation of policies and procedures that support HIPAA compliance, along with the security settings, monitoring, and auditing behind them.
